

JUNIOR FIRE PROTECTION/BUILDING CODE CONSULTANT

Pontem Group is seeking to hire a Junior Fire Protection/Building Code Consultant who enjoys undertaking diverse and challenging work. The successful candidate should have a good attitude and aptitude to learning and communicating with various types of project teams. This role will be focused on conducting technical fire and life safety reviews to the Building Code/Building By-Law and fire protection design work such as fire protection systems design. This role also includes Building Permit coordination work and may include other fire protection work such as fire modelling and egress analysis when required.

General Responsibilities:

- Review of drawings to the applicable Building Code/Building By-Law with regards to fire and life safety aspects
- Produce code reports and other technical reports based on project requirements
- Work on fire protection system designs
- Liaise with project teams, clients and the municipality to convey project and permit requirements
- Prepare proposals
- Manage small sized projects

Qualifications:

- Bachelor of Engineering or Bachelor of Applied Science
- Experience within the building construction industry is preferred but not required

Skills:

- Good communication
- Competent in Word, Excel, AutoCAD
- Experience with Bluebeam is preferred but not mandatory

Benefits:

- Health and Dental Benefits
- Group Registered Retirement Saving Plan
- Public Transit Reimbursement

Job Type: Full-time
